

OPPORTUNITY

A not-for-profit organization in Belleville, Ontario, saw an opportunity to reduce their heating consumption by working with **Demtroys Technologies**.

BUILDING

Category: **Low-rise building**
 Units: **40**
 Heated floor area: **1,858 m²**
 Levels: **4**
 Heating system type: **Gas**
 Annual heating portion of energy consumption: **74 103 m³**

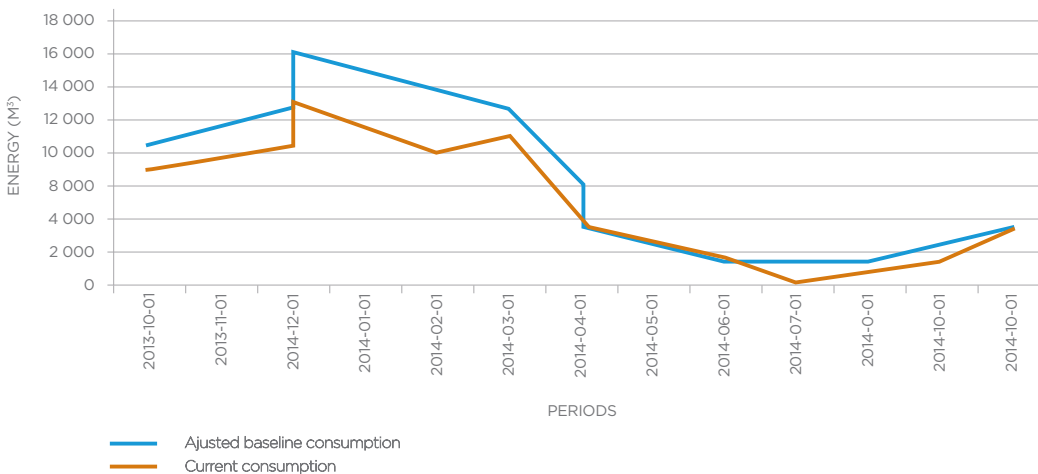

RESULTS

ECONOMIC ANALYSIS

Yearly savings and return on investment

Current Consumption vs Adjusted Baseline

By comparing the energy consumption level measured during the reporting period with the baseline level, the avoided energy consumption can be evaluated. In this case, the Demtroys system generated savings of 16 151 m³ after 12 months.

* The baseline energy consumption level has been adjusted according to the prevailing conditions throughout the reporting period, like outdoor temperature.
